What is the SMR Forum? The SMR Forum was created in late 2001, to provide a UK discussion platform for the vehicle leasing industry, specifically on the subject of vehicle service, maintenance and repair. Membership to the Forum is open to all leasing and fleet management companies and to invited motor manufacturers and other allied concerns.

Through discussion and pooling of data and experiences, the Forum provides a unique and hitherto undeveloped means of improving both vehicle management techniques and providing a two way, industry wide communication with motor manufacturers and allied organisations.

The primary purpose of this web access is to provide Forum members with the ability to register and comment on SMR issues.
